Estimated Schedule for DM510 (Operating Systems)

Date: June, 16th 2009
Location: IMADA's seminar room

Students are expected to show up plenty early. In principle, all students who are taking the exam on a particular date are supposed to show up when the examination starts, i.e., at the time the first student is scheduled. For this particular exam, we do not expect many no-shows, so showing up **one hour before the estimated time** of the exam should be safe.
