

- In week 41 we start with “Principles of Parallel Algorithm Design”, but we will not cover the complete chapter in that lecture (however I suggest to read the complete chapter). The slides were updated in the Blackboard System.
  - In week 43 we will start with “Basic Communication Operations” (Chapter 4 of the course book). Please read this chapter thoroughly, as it is a key component for scalability analyses that we will do later in the course.
- 
- There will be no teaching in week 42.
