

Network Programming (DM817) — Ugeseddel 6

Lectures in Week 11 We covered the following.

- Ahuja 5.7 (only pages 152-154) and 9.8.
- Ahuja 10.5 was NOT covered as only two showed up for the lecture thursday. This meant that the lecture was cancelled! You should read that section yourselves. We may return to it in the last part of the course if there is time.

2 week break As you know we now have a 2 week break and I strongly encourage you to spend whatever time you have available (after exams) to refresh what we have done so far. This will make it much easier for you to answer the final set of problems which will certainly address many of the topics covered so far.

Final exam project The plan is to hand that out on May 13. It should be handed in again on June 14. There will be classes both on May 17 and 18 and the material covered here will be relevant for the exam. There will be no classes after May 18.

Other classes cancelled There are no classes in week 16 and no class friday April 29.

Problems for April 5, 2011:

- DM33 Summer 1998 problem 5B
- Ahuja 9.38, 9.42, 9.44
- DM33 Summer 95 problem 3
- DM33 Summer 96 problems 2 and 3.

Lectures in Week 14

- Ahuja 9.10,9.11
- Ahuja 10.2
- BJG 3.11
