

DM817 – Fall 2020 – Weekly Note 11

This is the last weekly note. There are no more video lectures and no more exercises. You should spend the time to work on the second set of exam problems.

Material covered in week 49:

- BJK 2nd edition pages 342-345 on minimum cost branchings (we will not cover the part on matroids. These pages are available from the home page) [Video 28]
- BJK 8.7-8.8 on submodular flows (we only cover definitions and applications) [Video 29]
- Exercises on Weekly note 10 [Video DM817 Exercises WN10]

Second set of exam problems

These are available from SDU assignment from December 7. The solutions must be handed in by January 11 in the morning.
