August 4, 2014

Action regarding evaluation of DM839 F2014:

I am generally satisfied with the evaluation. One student seems to have been dissatisfied with parts of the course, but makes no comments to what this may have been. Based on the 7 completed questionnaires I see no reason to change neither the content, the planning nor the exam form of the course next time it is given. I will, however, try to use a bit less slides and do more traditional blackboard teaching for the more complicated topics.
