Re: Evaluation of DM203:

The course, DM203, Cryptology, was offered for during the spring semester of 2013. A course evaluation was performed at the end of the course.

This course is officially a computer science course, but it contains much mathematics and probability also. There were both computer science and mathematics students in the course. The evaluation of DM203, shows that the students thought that the course was difficult, but this is not surprising given that none of them were PhD students.

Overall the evaluation of DM203 gives no indication that major changes in the course should be made, though I am considering changing to another textbook next time I teach the course.

Sincerely,

Joan Boyar
