DM508 – Algorithms and Complexity – 2011
Note 10

Lecture, March 7

We finished string matching from chapter 32, covering the KMP algorithm. We also talked about the exam. This will be the last lecture.

Review session on March 17

There will be a review session on March 17, at the usual discussion section time. Come with questions about course content and the exam.

Last assignments

Pick up your last assignment in IMADA's "sekretariat" between 8:15 and 10:00 on Tuesday, March 15, or from me after that. The redos will be due at 3:00 on March 17.

Sign-up sheet for examination order

I do not yet know when the sign-up sheet for the examination order will be available. I'm hoping that you will be able to sign up in the last discussion section or the review session.
