DM551/MM851 – Algorithms and Probability – 2020 Lecture 20

Lecture, December 1, in U55

We began on chapter 32 in CLRS, covering the naive algorithm and the Rabin-Karp algorithm, and starting on finite automata. We did not prove the correctness of the finite automaton matcher.

Lecture, December 3, in U23

We will continue with chapter 32 in CLRS. This will be the last lecture, concentrating on the Knuth-Morris-Pratt algorithm.

Exam information session, December 15, online

We will talk about the exam. Come with questions. We will use the link I have used for lectures, which can be found under Announcements for this course in Blackboard.

No new problems
