

Introduction to Computer Science E14 – Discussion Sections – Week 43

The following link is to a tutorial which could help you with SQL questions:

<http://www.w3schools.com/SQL/default.asp> /

Start looking at it. The first set of exercises below asks you to express answers as relational operations, while some of the later ones ask you to express answers as SQL statements. Note, as mentioned on page 412 in the textbook, that the SELECT line in SQL statements really is a PROJECT in relational operations [pp. 407–411], not a SELECT.

- Start on pages 432–436: Problems 9, 10, 12, 13, 18, 24, 25, 26, 27, 28, 38.
