Computer Security – F02 – Lecture 5

Lecture, February 26

We finished chapter 4 in the textbook.

Lecture, March 5

We will cover chapter 5 and possibly begin on chapter 6 in the textbook.

Lecture, March 12

We will cover chapter 6 and possibly begin on chapter 7 in the textbook.

Discussion section, March 14

Do problems 5.1 through 5.7 in the textbook. Note that an EEPROM is an electric erasable programmable ROM. The memory contents can be changed using higher than normal voltage. Unlike with EPROM, it is not necessary to remove the memory from the computer to change it.

Projects

Begin thinking about your projects. You should make an appointment to talk with me about your project topic before March 21, and you should give me a definite topic title by April 2. I have some suggestions in case your ideas do not work out.
