

## Computer Security – F06 – Lecture 4

### **Announcement**

The discussion sections on Monday, February 27 will be at 16:15, see below.

### **Lecture, February 17**

We finished chapter 4 and most of chapter 5 of the textbook.

### **Lecture, February 24**

We will cover the rest of chapter 5 and (hopefully) chapter 6, security in Unix.

### **Lecture, March 3**

The plan is to cover chapter 7, security in Windows, possibly with some information on Multics security.

### **Discussion section: February 27 at 16:15**

The first three problems 6.1, 6.2 and 6.3 (partially) are “experimental”, so I propose that we meet in the big “Linux room” in the 49 building to try them out on the systems there. After we finish there, let us take the break and continue in the seminar room with problems 6.4–6.7.

I suppose we can then finish early!
