DM509 Programming Languages, Fall 2011, Action Plan

The course DM509 Programming Languages was evaluated as it is a second year course. Out of the 28 students, 13 have answered the course evaluation sheet.

The evaluation was very positive. Previous year's problems with the course material have been solved and the students are now very satisfied with it.

The new approach of using more practical projects (including programming of graphics in Haskell) together with the change of the exam form are clearly well-received.

To summarize, according to the evaluation, no major changes to the course are required.
