Programming A
6th Weekly Note (E13, Week 41)

Exam Project Part 2

The description of the 2nd part of the exam project is available from the course home page:

    http://www.imada.sdu.dk/~petersk/DM536/#project

Reading for Week 41

- Chapter 18 of "Think Python: How to Think Like a Computer Scientist"

Lecture: Monday, October 7, 08-10 (U110)

We first present the second part of the exam project. Then we start on the topic of object-orientation by introducing users-defined types and the difference between functions and methods.

Labs & Exercises: see detailed schedule on course home page

Continue with any left-over exercises from last week.

Then do Exercises 14.5–14.6 and 15.1–15.4.

Study Groups

Use your study group to discuss the 2nd part of the project. Try to understand which project you want to do for the 2nd part.
