### DM820 Advanced Topics in Programming Languages, Spring 2012, Action Plan

The course DM820 Advanced Topics in Programming Languages was run for the first time as a regular course after having been run as an individual study activity in Spring 2009. Out of the 11 students that signed up, 5 have answered the course evaluation sheet.

The evaluation was extremely positive and the course was perceived to be highly relevant to the overall curriculum. There is no indication that anything needs to be changed.
