

Evaluation of the course

DM833 Approximation Algorithms, Spring 2013

35 students signed up for the course.

26 students signed up for the exam.

18 of the 26 students filled in the evaluation form.

The evaluation is very positive, but there are a few suggestions for improvement:

- Let the students discuss exercises in class.

This is certainly something I will consider whenever time permits.

- Include more examples for the LP-techniques.

I will do that.

- Include a programming project.

Such a project takes a lot of time and there are many other courses with projects, so I would be reluctant to include a project as long as the course is only 5 ECTS.
